(54) Title: **BLISTER PACK LABEL**

(57) Abstract: The present invention relates to a label (20) for a blister pack. In particular, it relates to a label which makes it more difficult for a child to release a medicament from the blister pack without making it unduly difficult for the elderly or infirm to remove the medicament. We describe a medicament blister pack label comprising a first sheet having first and second faces and a second sheet (22) having first and second faces, wherein the first face of the second sheet and the second face of the first sheet are opposed and bonded together; wherein at least portions of the first face of the first sheet are provided with a permanent adhesive (24); and wherein the sheet includes lines of weakness (30) defining medicament release zones.
